

Response to 2002 NAMT Report

I have read the NAMT Committee Report and I agree with its content and its description of what happened at the NAMT final (2002) between Zhujiu-9p and FengYun-9p. As the referee of this event I remember clearly what happened and I think the Report is correct, accurate, fair, and balanced.

As a professional GO player who participated NAMT for many years, I would like to thank the NAMT organizers and the AGA people for their generous support over the years, the time they devoted, and the selfless contribution to this wonderful event. As a professional player, we should support the NAMT and AGA people for their work.
